15 Three jobs are to be done by 4 machines .Each job can be assigned to one machine only. The cost of each job on each machine is given in the following table

Machine/ Job	M1	M2	M3	M4
J1	18	24	28	32
J2	8	13	17	19
J3	10	15	19	22

What are the job assignments which will minimize the total cost?

16 There are nine jobs, each of which must go through two machines P and Q in the order PQ, the processing times (in hours) are given below:

Machine	Job(s)								
	A	B	C	D	E	F	G	H	I
P	2	5	4	9	6	8	7	5	4
Q	6	8	7	4	3	9	3	8	11

Find the sequence that minimizes the total elapsed time T. Also calculate the total idle time for the machines in this period.
